PROFILE

I am a highly motivated and dedicated software engineer with a true passion for creating innovative solutions. With expertise in Java, JavaScript, Spring Boot, SQL, HTML, and CSS, I possess a robust skill set that enables me to tackle complex challenges head-on. I thrive in dynamic environments, constantly seeking opportunities to learn and apply cutting-edge software development strategies. Committed to delivering high-quality results, I am confident in my ability to contribute to your organization's continued success.

SKILLS

- Java
- JavaScript
- SQL
- HTML
- CSS
- Spring Boot

EDUCATION

B.E(Computer Science)

Prof Ram Meghe College of Engineering And Management
CGPA - 8.47

2019 – 2022
Amravati, India

Diploma(Computer Science And Engineering)

Government Polytechnic College
Percentage - 67.88%

2016 – 2019
Khamgaon, India

SSC

A.K. National High School
Percentage - 76.60%

2015 – 2016
Khamgaon, India

PROFESSIONAL EXPERIENCE

Software Engineer(internship)

Virtual Internship with Hewlett Packard Enterprise offered by Forage

05/2023 – 06/2023
Remote

Over the period of May 2023 to June 2023, I gained valuable hands-on experience in various aspects of software engineering. Here are the tasks I accomplished:

- Created a Proposal for a RESTful Web Service
- Built a Basic RESTful Web Service
- Implemented the Ability to Upload Data
- Created Unit Tests

PROJECTS

Waste Food Management

Self Project

- The Waste Food Management Android Application is a mobile solution designed to streamline the process of collecting leftover food from donors and distributing it to those in need.
- The application is built using Java programming language, SQL for database management, PHP for connecting it to the server, and Android Studio for development.
- This application aims to bridge the gap between food donors and NGOs, ensuring that surplus food is efficiently utilized and reducing food wastage.

Library Management System

Self Project

- The Library Management System is a desktop application developed using Java, SQL, and Eclipse.
- It aims to assist librarians in efficiently managing and organizing books within a library.
- With an intuitive user interface, the system allows librarians to keep track of book details such as titles, authors, genres, and availability
- Additionally, it provides features like book check-in/check-out, reservation management, and overdue book notifications.

COURSE

Introduction To JavaScript

By Great Learning Academy

SQL TUTORIAL FOR BEGINNERS

By Skill Academy

GITHUB TUTORIAL FOR BEGINNERS
